

Solar Meshcore Project

Antenna

5dbi 17.8cm

solar mounts

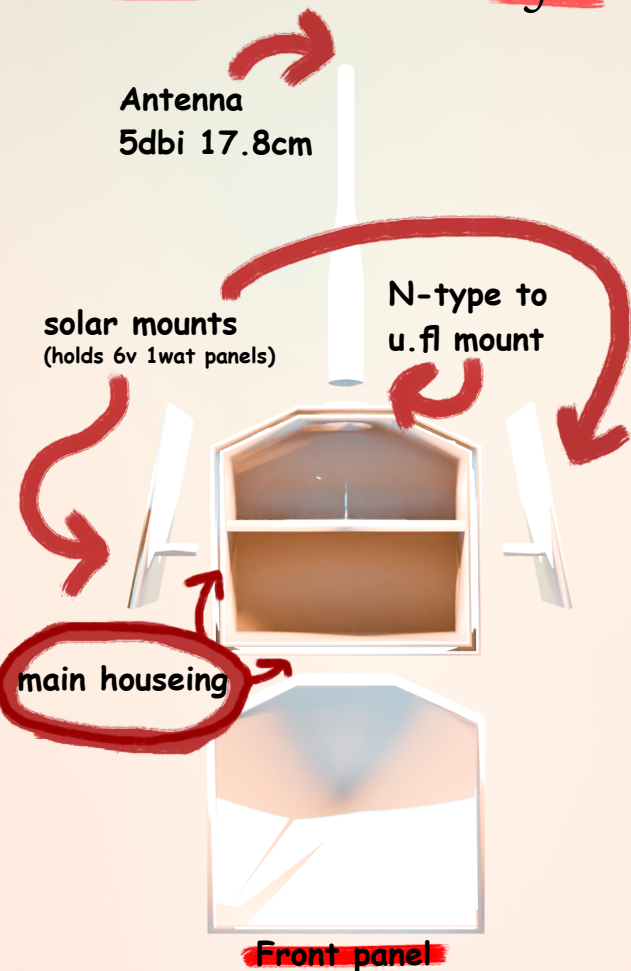

(holds 6v 1wat panels)

N-type to

u.fl mount

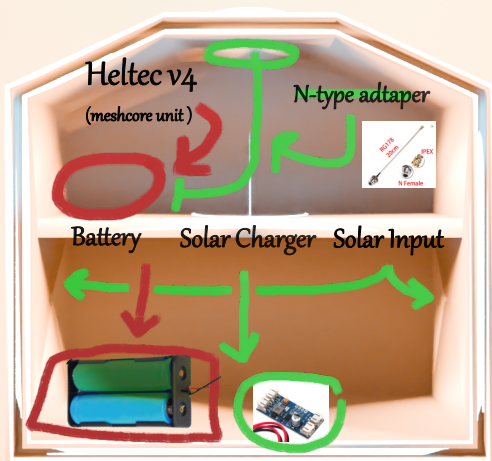

main housing

Front panel

main housing

A simple image showing the design of this case, and where all the components will go.

meshcore wiring.

Using a gapfiller on the solar wires will keep water out. and i may also fill the n-type adtaper to keep water out from the top. depending on how tight it feels.

blue are outputs and orange are inputs.
